SUMMARY

Experienced in technical support with a strong foundation in IT troubleshooting and computer systems. Skilled in diagnosing hardware and software issues, providing user support, and maintaining system functionality in a fast-paced environment. Demonstrates a proactive approach to learning and adapting in real-world IT settings, with a commitment to continuous skill development and professional growth.

EDUCATION

Apprentice Under K-Youth Development Programme (September 2024)

Machining, automation and robotic track (course Productivity AI and IOT)

UniKL Malaysian Institute of Information Technology (August 2021-July 2024)

Diploma In Information Technology (CGPA 3.57)

WORK EXPERIENCE

Aaxis Technologies Sdn Bhd - Customer Support Engineer (August 2024 - April 2025)

- **Provided first-level technical and application support** via phone and remote sessions for both HIS (Hospital Information System) and non-HIS systems.
- **Handled helpdesk operations** including call logging, ticketing, and issue escalation
- Offered **after-hours technical support** to maintain hospital IT operations and business continuity.
- **Monitored Server Room operations and ICT alerts** after office hours to ensure system uptime and reliability.
- Provide **phone support** and **respond** to **user inquiries** regarding the HIS (Hospital Information System)
- **Interact professionally** with customers and maintain good working relationships with users and management to ensure high customer satisfaction
- **Supported daily hospital IT operations**, ensuring all devices, systems, and networks functioned smoothly.
- **Escalated critical issues** promptly to the relevant technical, application, and project management teams to minimize downtime.

Aaxis Technologies Sdn Bhd - Technical Support Engineer (May 2025 - Nov 2025)

- Provide **Level 1 technical assistance** to medical staff, administrative personnel, and other hospital departments.
- **Troubleshoot** and **resolve issues** related to computers hardware and software, hospital systems, printers, and network connectivity.
- **Support users** in **accessing Hospital System** (HIS), PACS, LIS, and other healthcare-specific software.
- **Install, configure, and maintain** desktops, laptops, printers, monitors, and medical-related IT devices.
- **Diagnose** and **repair hardware failures**.
- **Manage IT asset inventory** and perform.
- **Install, configure, and update operating systems** and hospital applications.
- **Assist** in basic network troubleshooting
- **Support domain account management**, including password resets, profile issues, and Active Directory object handling.
- **Maintain detailed logs** of technical issues, resolutions, and changes.

- **Axis Technologies Sdn Bhd - Network & Server Engineer** (Nov 2025 - Present)
-
- Configured and maintained switches and wireless access points (APs) across the hospital network, including core switch management.
- Deployed Cisco Catalyst 1000 Layer-3 switch with multi-VLAN segmentation (Admin, User, Management); implemented DHCP relay, inter-VLAN routing, and static default routing.
- Enforced network security controls – Port Security (MAC sticky, shutdown), BPDU Guard, PortFast Edge, and DHCP Snooping with trusted trunks; verified switch performance for zero-downtime production readiness.
- Managed and maintained servers supporting the Hospital Information System (HIS) to ensure continuous clinical operations.
- Set up and maintained a dedicated server for vendor use, handling configuration and ongoing administration.
- Administered virtualized infrastructure using VMware vSphere and ESXi, and integrated HPE Alletra 6000 storage into VMware vCenter 7, diagnosing datastore protection alerts and aligning volume collection policies.
- Maintained NAS and SAN storage systems, validating snapshot and replication protection policies for data resiliency on production volumes.
- Maintained backups for application servers and department shared folders to support business continuity and disaster recovery.
- Environment: Cisco Catalyst C1000-24T-4G-L | VMware vSphere/ESXi | VMware vCenter 7.x | HPE Alletra 6000 | HPE SCM Plugin | Layer-3 Campus Network

ADDITIONAL PROJECT

Fintech Terminal (Private / In Development)

- Designed and built a Bloomberg-style financial terminal application featuring a dense, professional research-desk UI (dark theme, monospace font, orange accents) across Markets, Dashboard, and Crypto trading screens.
- Implemented live-updating market data tables (stock indices, forex, commodities, bonds, crypto), a Fear & Greed sentiment index, market breadth and top gainers/losers panels, an economic calendar, and real-time exchange hours.
- Built a crypto trading interface with candlestick charting, a live order book, and a paper-trading order entry system with mock balance and order execution.
- Built end-to-end using AI-assisted development (Claude Code).

Personal Portfolio Website

- Designed and built a personal portfolio website to showcase professional experience, skills, and resume, using AI-assisted development (Claude Code).
- Integrated resume content and automated resume editing via the Canva API; deployed live on GitHub Pages.

EXTRA CERTIFICATION

Apprentice Under K-Youth Development Programme

Certificate of Completion from T-Robot & MTDC Academy for Machining, automation and robotic track (course Productivity AI and IOT)

(September 2024)

SKILLS

Infrastructure: VMware ESXi, VCenter, Window Server

Networking: Cisco, Sangfor, VLAN, Server Policies, DHCP, DNS, Core Switch Management

Backup: Veeam, Synology, NAS Storage

Scripting: VBScript, Powershell, Python, Bash

LANGUAGE

- Bahasa Melayu (Native)
- English (Excellent)
